## **Using Filing Analytics**

Click **BROWSE** to start to view IP law firm and applicant lists categorized by country. Scroll to the country that you are interested in. This might be your own jurisdiction, or the jurisdiction you want to do business in. Next to the country, under the "View" category you are able to select **LAW FIRMS** or **APPLICANTS** to retrieve a ranking and detailed information.

- 1. **Minimum number of applications** that are processed by a firm— use the slide function to select from 1 to 99.
- 2. **Perspective** provides selected views based on European or individual country views. Note: The Perspective filter can only be changed by country for EP countries, or by state in the United States or Germany.
- 3. **Time period** lets you restrict results to the past 2 years, past 3 years, or all information available for firms' filings.
- 4. **Firm Names** can be sorted alphabetically.
- 5. **Sent to** displays the number of patent applications that have been filed or sent to your jurisdiction by this firm.

- 6. **Received from** displays the number of patent applications received from firms based in your jurisdiction.
- 7. **Ratio** calculates Sent applications over Received applications in your jurisdiction. A ration of 4 means that a particular firm has sent 4 times more patent applications than they have received within your jurisdiction.
- 8. **Predicted Filings** estimates the number of filings the firm may make into your jurisdiction over the next 12-month period based on historic analysis.
- 9. **Pending PCT** is the number of published PCT applications filed by a firm that have yet to be entered into the national/regional phase. i.e. the national/regional phase application deadline has not yet passed.

### Law Firm Details

By clicking on a law firm name, you will see a summary of that law firm's reciprocity activity, a bar chart overview of their recent incoming and outgoing filings and their agent network. By clicking on any of the bars you will receive the client and case details.

- 4. **Exclude Applicant Filed** will remove self-filed applications from the map results. If you tick this box all cases where the applicant has filed the patent without any assistance of a law firm will then not be listed.
- 5. **Exclude** feature allows any given applicant to be removed from the map search by clicking the exclude "X" button to the right of their name. This may be useful for large 'outlier applicants' that may skew the firm and/or technology aggregations.

## Tips for Using Filing Analytics

# **Frequently Asked Questions**

#### What databases are used in Filing Analytics (FA)?

FA accesses data from more than 30 national and international databases.

#### What type of IP is included within FA?

FA includes patents and utility models, but it excludes divisional, continuation applications, designs or trademarks.

#### How often is FA updated?

Updates are performed weekly for most countries depending on the update frequency of national and international databases.

#### Which countries are covered in FA?

FA currently covers data from the following 33 countries:

AUSTRALIA, AUSTRIA, BELGIUM, BRAZIL\*, CANADA, CHINA, CZECH REPUBLIC\*, DENMARK, FINLAND, FRANCE, GERMANY, HONG KONG\*, ICELAND, INDIA\*, IRELAND, ISRAEL\*, ITALY, JAPAN, KOREA, LIECHTENSTEIN, LUXEMBOURG, NETHERLANDS, NEW ZEALAND, NORWAY, RUSSIAN FEDERATION, SINGAPORE, SOUTH AFRICA\*, SPAIN, SWEDEN, SWITZERLAND, TAIWAN, UNITED KINGDOM, UNITED STATES OF AMERICA.

#### \*limited data

#### Why doesn't FA cover all countries?

FA covers all key countries and is always being updated with new information. Possible reasons why some countries aren't currently included in FA are most likely due to their being no centralised or interoperable database that FA can access.

#### Does FA display only accepted patents and the number of PCT applications?

FA displays all patents and the number of PCT applications that have been published, regardless of whether they have been accepted or not.

#### What is the difference between PCT+Outgoing Clients and Agency Clients?

"PCT+Outgoing Clients" lists patent applicants for whom the selected law firm drafted the originating PCT or outgoing application.

"Agency Clients" lists patent applicants for whom the selected law firm has received business where **another** firm has drafted the originating PCT or outgoing application.

## What is the difference between Incoming Cases and Outgoing Cases (in the Technology view)?

"Incoming Cases" refers to Paris Convention applications received by a selected firm within each technology area.

"Outgoing Cases" refers to cases in which the selected law firm drafted the originating Paris Convention application.

#### How is the information on technology of patent applications determined?

The Technology area we determine by the top-level IPC code on the application. The classification system is proprietary. Practice Insight endeavored to develop a palatable way to group all IPC codes into Top and Sub-level with the objective to be understood by non-subject matter experts. The Technology view helps you to get an approximate indication of the primary focus areas of any given firm.

#### Why are some 'Sent To' fields under Recent Filings empty?

The Patent and Trademark Office has not yet published the information, and we have not yet received it and been able to update our database.

# Is the Filed/Due Date in Recent Filings (Applicants) the date of the entry into the national phase?

Yes, the Filed/Due Date displays the entry into national phase.

#### What time span is covered in the download report?

The downloaded report includes all applications three years prior to download date based on the deadline (PCT 31 months/Paris Convention 12 months) e.g. report run on Feb 8 2008 will include published national phase applications where the priority date of the PCT application has a priority date on or after 2011-07-08 (31-month national phase deadline of 2014-02-08); and direct Paris Convention applications where filing date of the complete application was on or after 2014-02-08.

## What time span is covered in Filing Analytics when I select time period equals 'All Available'?

'All Available' covers approximately five years of historical data for most jurisdictions in the FA database.

# While Browsing Law Firms, what does the number under 'Total Incoming Agency' refer to?

This is the number of filings received by a firm, where the selected law firm did not file the original application.

#### Upcoming RPE Apps: how far into the future do you look?

Upcoming RPE Apps displays cases with pending due dates 12 months into the future.

#### What types of patent filings does Map Explore include?

PCT and Paris Convention Filings, based on the Application address.

#### Why are law firms from different areas appearing in Map Explore?

Map Explore shows the filing address of the Applicant, not the corresponding law firm. Occasionally, even a firm from a different country will appear under "Top Firms" because an Applicant is using this firm to draft their PCT applications.

#### What does the field 'Exclude Applicant Filed' in the Map Explore mean?

If you tick this box all cases where the applicant has filed the patent without any assistance of a law firm will not be listed on this screen.

#### Why would a case be missing from FA?

A few possible reasons exist why a specific case may be missing from our database:

- The case is a Validation, and Validations do not appear in FA.
- The case was assigned to a law firm other than the one searched or selected.
- Some updates may take 3-6 months to be published which delays when we receive the respective data.
- Cases in FA only appear when 2 or more law firms from separate countries have filed.
